# jcp.org status

- New site was launched 16 June.
- Promotion and training events held during the launch week.
- Some initial glitches, but the site is performing well.
- PMO staff are working a variety of non-critical issues prior to defining phase 2.
- Feedback?
  - How can we encourage more member participation?

# JCP 2.7 transition

- 27 May: Maintenance Release posted.
- 16 June: in-flight JSRs migrated from JCP 2.6 to 2.7.
- PMO processes and jcp.org documents have all been updated.
- Transition has been mostly smooth, but some JSR milestone postings have been slightly delayed.
  - Delays usually caused by new licensing requirements but sometimes by new transparency requirements.

# 2009 election plans

- Replace Price Waterhouse Coopers with an online Electronic Voting service.
  - Built-in security and presentation abilities.
- EC members to act as internal auditors (as in the 2009 Special Election).
- Timing changes mandated by JCP 2.7 (combing the ratified and elected phases).
- Significant cost and time savings are expected.
- NOTE: 2009 is a “light year” (only one elected seat on each EC is up for election).
  - This will probably reduce voter participation.

# ME Working Group status

## Verbal Report

Sean Sheedy, John Rizzi, Patrick Curran

# JSR 330 acceleration

- From Roberto Chinnici's email:  
“We request that the SE/EE Executive Committee recognize that JSR-330, by the openness and transparency of its working process, has effectively met all the requirements listed in the process document for the Early Draft Review, and consequently that it should be allowed to submit a draft for Public Review without further ado...”

Naturally, we envision that similar criteria be applied in the future to any JSR that satisfies the same requirements for openness and transparency, and we hope that a future revision of the JCP Process Document will explicitly account for this situation.”

# Next meeting

- Face-to-face meeting: September 10-11 2009  
– Princeton, NJ (hosted by Siemens)
