JSR 367 (JSON Binding) Review

September 15 2016

Dmitry Kornilov

Agenda

- Goals
- Information to be gathered
- Next Steps
- Issues
- Q&A

Goals

Goals (1/2)

- Support binding (serialization and deserialization) for all RFC 7159-compatible JSON documents.
- JSON-related specifications will be surveyed to determine their relationship to JSON-Binding.
- Maintain consistency with JAXB and other Java EE and SE APIs where appropriate.
- Define default mapping of Java classes and instances to JSON document counterparts.
- Allow customization of the default mapping definition.

Goals (2/2)

- Default use of the APIs should not require prior knowledge of the JSON document format and specification.
- Define or enable integration with JSR 374: Java API for JSON Processing (JSON-P) 1.1.

Information to be gathered

About this JSR

JSON-B is standard binding layer for converting Java objects to/from JSON documents

Java

```
public class Customer {  
    public int id = 1;  
    public String firstName = "John";  
    public String lastName = "Doe";  
    ....  
}
```

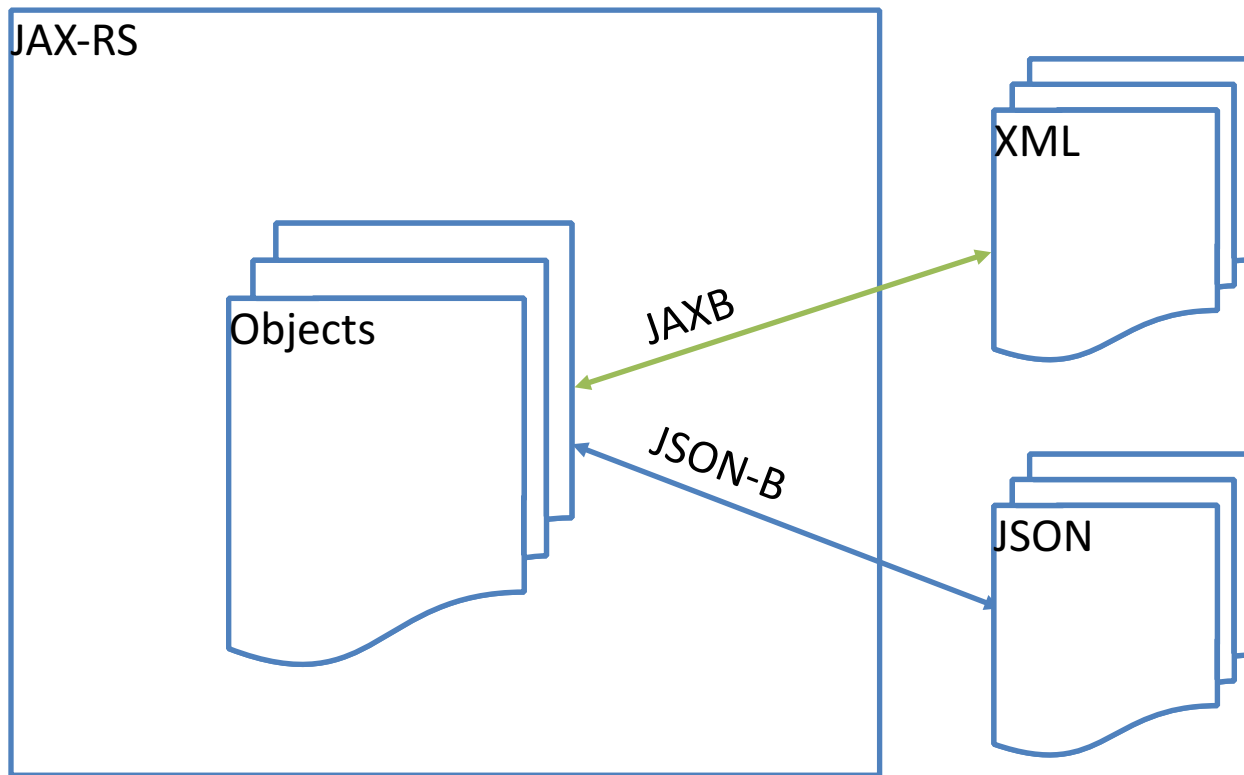

JSON

```
{  
    "id": 1,  
    "firstName": "John",  
    "lastName": "Doe",  
}
```

About this JSR

Usage in Other Java EE Frameworks

Introduction

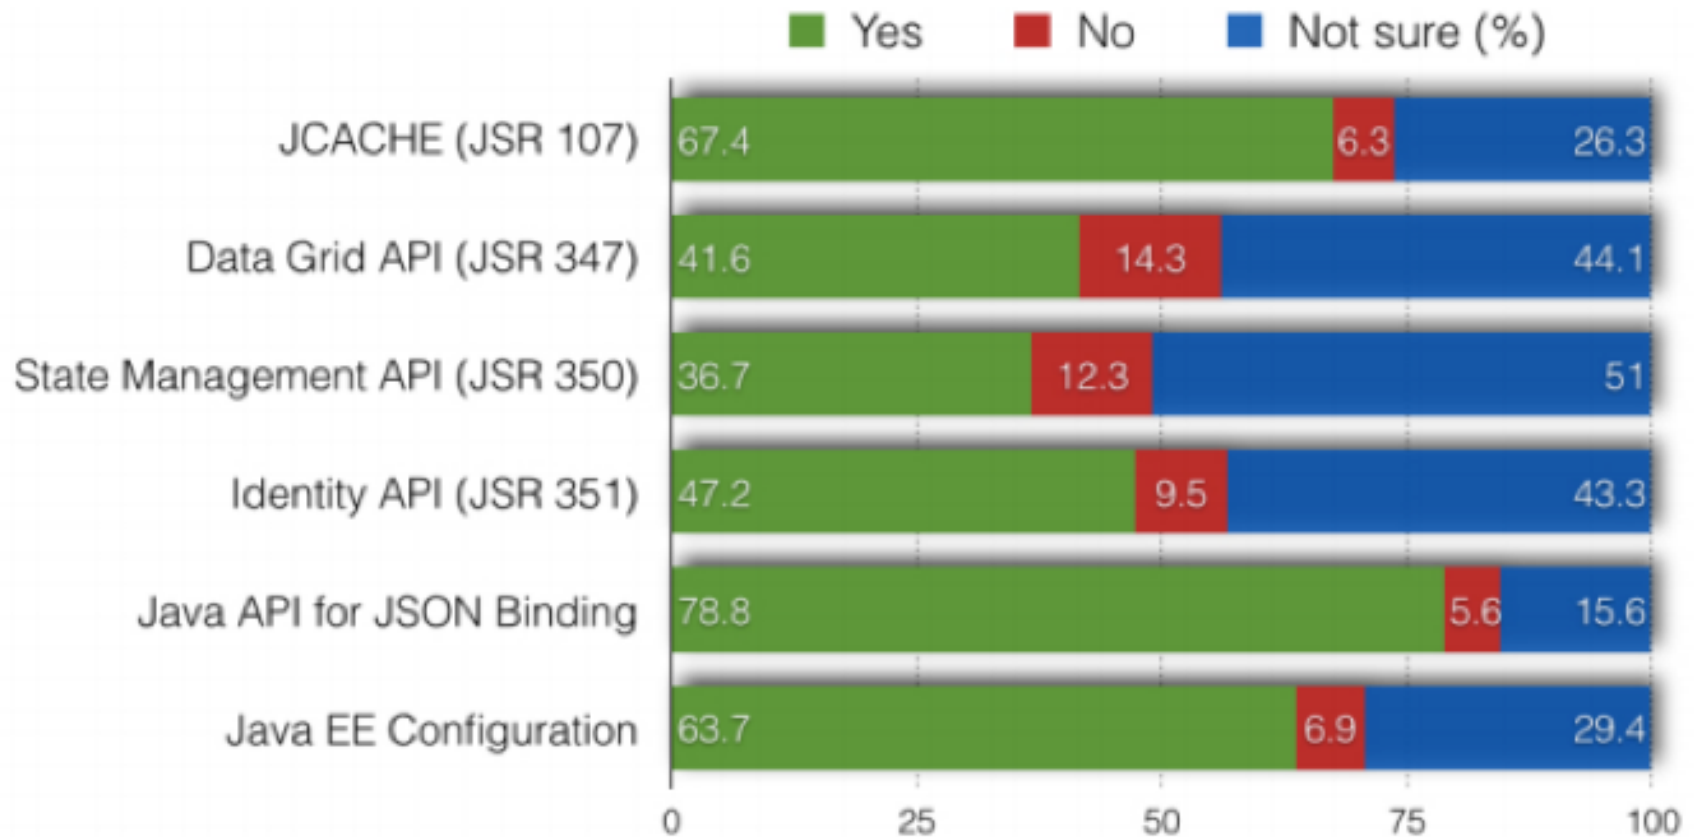

- Supports Java EE 7
- Targeted for inclusion in Java EE 8
- One of the core parts of Java EE 9

Business/marketing/ecosystem justification

Which of these APIs do you think is important to be included into Java EE 8?

Business/marketing/ecosystem justification

- Many services are offering data via JSON messages that Java developers need to interact with as Java objects.
- There is a need in other frameworks like JAX-RS to convert objects to/from JSON
- JAXB analog for JSON
- Standardize current technology

History

- 26 Aug 2014 – JSR Submitted
- 23 Sep 2014 – Expert Group Formation
- 20 Aug 2015 – Early Draft Review
- 26 July 2016 – Public Draft Ballot

Technical scope and features

Default Mapping

- Basic Types
- Specific Types
- Dates
- Classes
- Collections/Arrays
- Enumerations
- JSON-P types

Customized Mapping

- Property names
- Property order
- Ignoring properties
- Null handling
- Custom instantiation
- Custom visibility
- Date/Number Formats
- Binary Handling
- Adapters
- Serializers/Deserializers

Technical scope and features

- Annotation based customizations
- Easy runtime customizations using JsonbBuilder
- Full support of generic types
- Integration with JSON-P
- I-JSON support

The Expert Group

- **Dmitry Kornilov (Oracle)**
- Przemyslaw Bielicki
- Eugen Cepoi
- Martin Vojtek (Datlowe)
- Rick Curtis (IBM)
- Nathan Rauh (IBM)
- Roman Grigoriadi (Oracle)
- Alexander Salvanos
- Hendrik Saly
- Otavio Santana
- Inderjeet Singh
- Kyung Koo Yoon (TmaxSoft)
- Romain Manni-Bucau (Tomitribe)
- Gregor Zurowski

The Expert Group

- Main communication channel is experts mailing list
- If needed we setup a videoconference using Zoom, Skype or Hangouts
- Face to face conversations

Other deliverables

- JSONB web site (jsonb.java.net)
- Samples is a part of the spec
- Sample projects on GitHub

Publicity

- JavaOne 2015
- EclipseCon 2016 NA
- JavaOne 2016

Collaboration with other community groups

- Presentation for CZ JUG
- Presentation for Bentonville JUG
- Faso JUG Adopts JSR 367
 - <https://github.com/pandaconstantin/adopjsrfasojug>
- First look on JSR-367 (Turkish)
 - <https://blog.kodcu.com/2016/09/json-binding-jsr-367-incelemesi/>
- JSONB test-drive using JAX-RS

IP flow

- Spec, RI and TCK licenses:
 - <https://www.jcp.org/en/jsr/detail?id=367>
- Code contributions from non JCP members:
 - Accepted on GitHub or Eclipse.org
 - Reviewed and merged
 - We didn't have any yet
- Terms of Use of our collaboration tools:
 - <https://www.java.net/javamet-web-site-terms-use>
 - <https://help.github.com/articles/github-terms-of-service>
- No legal issues so far

RI and TCK development

- RI is developed as an open-source project
 - <http://git.eclipse.org/gitroot/eclipselink/eclipselink.runtime.git>
- Binary download
 - <https://oss.sonatype.org/content/repositories/snapshots/org/eclipse/persistence/jsonb-ri/1.0-SNAPSHOT/>
- Main committers:
 - Roman Grigoriadi (Oracle)
 - Dmitry Kornilov (Oracle)
 - David Kral (Oracle)
- TCK development is not started yet

Participation and transparency

- JCP.org page
 - <https://www.jcp.org/en/jsr/detail?id=367>
- Specification project page
 - <https://jsonb-spec.java.net>

Adopt-a-JSR

- We are participating in Adopt-a-JSR program
 - Presentation for CZ JUG
 - Presentation for Bentonville JUG
 - Faso JUG Adopts JSR 367
 - <https://github.com/pandaconstantin/adopjsrfasojug>
- Where is no contribution to the project received

Mailing lists or forums

- Mailing lists:
 - Experts, Users, Issues
 - <https://java.net/projects/jsonb-spec/lists>
- Total number of messages: 562
- Average per Month: 25.5

Next Steps

Schedule

Next Steps

- RI
 - Performance testing
 - Performance comparison
 - Performance optimization
 - Test on real life use cases
- TCK
- Evangelism
 - Samples, guides, manuals
 - Blog articles
 - Conferences

Next Steps

- JSONB 1.1
 - Integration with other Java EE frameworks (JAX-RS, JPA)
 - JSON Pointer
 - Partial Mapping

Issues

Issues

- Integration with JSON-P
- Resources for TCK
