Java™ Communities in Action

A Celebration of Community Collaboration

Wednesday, June 11, 2003

While you're at the 2003 JavaOne™ Conference, don't miss a Wednesday evening event, June 11, for an exclusive opportunity to participate in Java Communities in Action, including the Java Community Process℠ (JCP℠) program, the Jini Community℠ and Project JXTA.

This is your chance to mingle with fellow Java™ technology architects and developers, and meet with the companies most involved in the continued growth and success of Java technology.

Located in the Renaissance Parc 55, minutes from Moscone, you'll hear opening remarks by Rob Gingell, Sun Fellow and Vice President, on Java technology community development, followed by breakout sessions on developments in the JCP program from members of the JCP executive committee and program office, JiniFest!, a Project JXTA Town Hall Meeting and a Communications session for JCP Expert Group members.

We look forward to seeing you there!
