**JSR #381 Visual Recognition - Early Draft Review
Checklist for Transparency**

This information supercedes information found on the original JSR submission.

- **Is the schedule for the JSR publicly available, current, and updated regularly?**
  Yes. It is available in the files directory of our groups.io docs.
  https://groups.io/g/visrec/files/

- **Can the public read and/or write to a wiki for the JSR?**
  Yes, on the repository of the spec but it's not actively maintained:
  https://github.com/sevarac/VisualRecognitionApi/wiki. Discussions of the VisRec JSR are active on the mailing list (hosted by groups.io).

- **Is there a publicly accessible discussion board for the JSR that you read and respond to regularly?**
  Yes. We use the mailing list facilities of groups.io to host discussions. The main collaboration page of our VisRec JSR is here.

- **Have you spoken at conferences and events about the JSR recently?**
  We have mentioned the pending JSR at Devoxx, JavaOne 2017, Chicago User Group and GoToChicago

- **Are you using open-source processes for the development of the RI and/or the TCK?**
  We make use of common open-source Git processes to develop the RI and TCK.

- **What are the Terms of Use required to use the collaboration tools you have prepared to use with the Expert Group, so that prospective EG members can judge whether they are compatible with the JSPA?**
  GitHub's Terms of Use:
  https://help.github.com/articles/github-terms-of-service/

- **What is the location of your publicly-accessible Issue list? In order to enable EC members to judge whether Issues have been adequately addressed, the list must make a clear distinction between Issues that are still open, Issues that have been deferred, and those that are closed, and must indicate the reason for any change of state**.
  Contributors and the EG may publicly create, modify and close issues on the GitHub issue tracker. It's not mandatory because all issues are addressed

during the weekly meetings and on the mailing list. The GitHub repo: https://github.com/sevarac/VisualRecognitionApi/issues

- **What is the mechanism for the public to provide feedback on your JSR?**
  The VisRec mailing list hosted by groups.io is an open mailing list. Anyone can post after they are accepted into the group.

- **Where is the publicly-accessible document archive for your Expert Group?**
  We use the [Files facility on groups.io](#) ("visrec") to host any public documents relating to JSR #381

- **Does the Community tab for my JSR have links to and information about all public communication mechanisms and sites for the development of my JSR?**
  Yes, the mailing list and the publicly accessible GitHub repositories for the TCK, RI and Spec.

- **Do you have a Twitter account or other social networking feed which people can follow for updates on your JSR?**
  Twitter account: https://twitter.com/visrecognition   @VisRecognition

- **Which specific areas of feedback should interested community members (such as the Adopt-a-JSR program) provide to improve the JSR?**
  We'd like to receive feedback on how to simplify the usage of the spec/API by providing alternatives of the API. Implementing the API shouldn't be overly complicated and any feedback regarding that is valuable. Open suggestions/feedback are always welcome!
