PMO General Topics

The PMO presented its usual set of statistics and updates. EC members were reminded of their duty to vote and participate in the meetings of the EC.

Plans for June Meeting and JavaOne

The PMO reminded the EC members of the plans for the EC meeting in June, after JavaOne. Unfortunately, the PMO was unable to find a user group interested in having a meeting the week after JavaOne, but another press event is being planned for the afternoon of the second day. The PMO also presented plans for the JavaOne conference, including JCP specific sessions, BOFs and events.

JSR 215 Update

the PMO thanked the EC members for their almost unanimous votes and participation in the JSR. Two items from the JSR have already been addressed and the other seven are being actively worked on in weekly meetings. The JSR is on schedule.

Uber Ad Hoc Update

The PMO reminded EC members of the work going on in the ad hoc group, and some of the important topics being discussed there. These include the JCP's handling of the licensing of TCKs and the use of products as reference implementations. The group continues to meet on a bi-weekly basis to discuss and work on these issues.

Java Web Activities

Ingrid Van Den Hoogen, Director of Java and Strategic Marketing at Sun Microsystems gave a brief overview of some new initiatives being rolled out at JavaOne and asked for the EC member's support and participation.
