JSR 355: JCP EC merge

March 6, 2012

Background

- Currently we have two separate ECs, one for Java ME and one for Java SE and Java EE combined.
- The ECs have agreed that since *Java is One Platform*, and since we expect ME and SE to converge over time, we should merge the two ECs into one.
 - JSR 355 will focus on making this change.
- We will reduce the number of seats, and keep the same ratio (2:1) of ratified and elected seats.
 - Oracle will give up one of its permanent seats.
 - No other member may hold more than one seat.
- The change will be initiated during the 2012 elections, but will be implemented over time.

Current status

- [JSR 355: JCP Executive Committee Merge](#) was approved on February 20 with 21 yes votes and 1 abstention.
 - The following EC members were eligible to vote but did not do so: Azul Systems, Twitter, ARM, Stefano Andreani, Cablelabs, Werner Keil.
- The [java.net project](#) has been created.
 - Meeting minutes and materials have been posted.
 - Issues have been filed.
- Target dates:
 - Early Draft Review: April 2012
 - Public Draft Review: May 2012
 - Proposed Final Draft: July 2012
 - Final Approval Ballot: August 2012

The current Working Group consensus

- Reduce the size of the merged EC to 25 members.
- Merge the ECs after the 2012 election and eliminate Oracle and IBM's second seats at this time.
- Allow the 2013 cohort to serve out their terms, and then eliminate the remaining seats and require everyone to stand for re-election in 2013.
 - Reconsider the goal of 25 seats before the 2013 election – if we need to change this, do so with a Maintenance Release of JSR 355.
- Switch to a two-year election cycle.
- Do not change the meeting quorum or the number of votes required for JSRs to be approved.

We're done!

Not quite (next steps)

- We need to move the JSR through the process, but this should be mostly routine since we have a strong consensus and a clear plan for implementation.
- We should have no problem meeting the proposed schedule and completing by August (or earlier.)
- We should take the opportunity to implement minor bug-fixes resulting from JSR 348.

Towards Early Draft Review

- Preliminary draft documents for review:
 - JCP 2.9 Process Document: [redline](#)
 - JCP 2.9 Process Document: [clean](#)
 - EC Standing Rules: [redline](#)
 - EC Standing Rules: [clean](#)

Appendix

Backup data

Current composition of the ECs

Seats expiring in 2012	
Ratified (SE/EE)	Credit Suisse, Fujitsu, HP, IBM
Ratified (ME)	AT&T, Siemens, T-Mobile, Vodafone
Elected (SE/EE)	London Java Community
Elected (ME)	CableLabs
Seats expiring in 2013	
Ratified (SE/EE)	Goldman Sachs, Red Hat, SouJava
Ratified (ME)	RIM, Samsung, TOTVS
Elected (SE/EE)	Eclipse, Google
Elected (ME)	Stefano Andreani, Aplix
Seats expiring in 2014	
Ratified (SE/EE)	Ericsson, Intel, SAP
Ratified (ME)	IBM, Nokia, SK Telecom
Elected (SE/EE)	Twitter, Azul
Elected (ME)	ARM, Werner Keil

Proposed implementation (1)

- Hold the 2012 elections as usual but inform candidates that they will serve only a one-year term if elected.
- Merge the two ECs immediately after the 2012 election and eliminate Oracle's and IBM's second seat.
 - The merged EC will therefore have 30 members, although some may from time to time have lost their voting privileges due to non-attendance.
- Eliminate three ratified and two elected seats in the October 2013 elections, reducing the EC to 25 members.
 - All remaining seats (including those who were elected in 2012) will be up for re-election in 2013.

Proposed implementation (2)

- After 2013 we will reset to a two-year election cycle.
- Rank members elected in 2013 to determine whether their initial term will be one or two years.
 - The 50% in each of the group of ratified and elected members who receive the most votes will serve an initial two-year term, while the others will serve an initial one-year term.
- All members elected in 2014 and subsequently will serve a two-year term.
