

#	Change Description	Reason	Spec Version	Status
1	A typo on page 15: "2.2.2 Device Requirements)	Extraneous parenthesis removed	1.1	Proposal
2	In Appendix A.13, removed the following requirements related to clearing a buffer associated with a Bluetooth PushRegistry endpoint : <ul style="list-style-type: none">• "MIDlet opens (notifier = Connector.open) and then closes the connection (notifier.close())• "The user disapproves autolaunch of the MIDlet"• "The push MIDlet is launched but terminates without reading the buffered data"	Relaxed requirements for flushing Bluetooth PushRegistry buffers since not all native Bluetooth stacks may be able to accommodate more aggressive requirements	1.1	Proposal
3	In Appendix A.13, the requirement "...all Bluetooth push buffers in the mobile device MUST be cleared when the mobile device is switched off." was changed to "...all Bluetooth push buffers in the mobile device MAY be cleared when the mobile device is switched off."	Relaxed requirements for flushing Bluetooth PushRegistry buffers since not all native Bluetooth stacks may be able to accommodate more aggressive requirements	1.1	Proposal
