JSR-258 Mobile User Interface Customization API - Change Log

#	Change Description	Reason	Spec version
1	<p>Clarification to definition of permission classes:</p> <pre>javax.microedition.theme.ManagePermission javax.microedition.theme.ModifyPermission</pre> <p>Both permission classes will be defined to only have a single constructor that takes no arguments. This is what can be assumed by reading the specification, but should be more explicitly stated.</p>	<p>The permission definitions do not explicitly state which constructors are intended to be provided. This can cause different interpretations.</p>	1.0
