JSR 354 - Transparency Checklist

The Specification Lead for each JCP 2.8/2.9 JSR should make the answers to the following questions available on the Community tab of the JSR, providing pointers where applicable..

- Is the schedule for the JSR publicly available, current, and updated regularly?
  Yes.

- Can the public read and/or write to a wiki for the JSR?
  Yes: http://java.net/projects/javamoney

- Is there a publicly accessible discussion board for the JSR that you read and respond to regularly?
  Yes on Yes: http://java.net/projects/javamoney there are forums, as well as a public mailing-list.

- Have you spoken at conferences and events about the JSR recently?
  Yes, Rome, Berlin, Zurich, Köln and more.,

- Are you using open-source processes for the development of the RI and/or the TCK?
  Yes, mailinglist is completely public. Code Repository is on Github.

- What are the Terms of Use required to use the collaboration tools you have prepared to use with the Expert Group, so that prospective EG members can judge whether they are compatible with the JSPA?
  All tools are publicly and worldwide available. Most often we rely on Google and mail for communications, including Google Hangouts for video conferences. Telephone conferences, when required were hosted by Credit Suisse. Worldwide available local dial-in numbers were published to the public mailing list for each conference call.

- Does the Community tab for my JSR have links to and information about all public communication mechanisms and sites for the development of my JSR?
  Yes, there are links to the project Wiki, the public mailing-list, source code repository, issue tracker and forums.
